

# Autopilot

## AUTOMATED STEERING SYSTEM

The Trimble® Autopilot™ automated steering system provides integrated, high-accuracy steering in any field type—hands free. The Autopilot system automatically steers your vehicle on line for maximum precision and increased productivity in the most demanding farming applications.

Enhance your farming performance and operate at higher efficiency by using the Autopilot system, and stay on line, all the time. When your vehicle is offline, the Autopilot system signals it to adjust its position to follow the correct path—no matter the field pattern or terrain type—so you can focus on the job ahead of you.

### CLUTTER-FREE INSTALLATION

The Autopilot system integrates directly into your vehicle's hydraulics or steering column, allowing you to obtain clear access to cab controls. It also plugs in to many guidance-ready vehicles, minimizing the need for additional equipment.

### INCREASED PRODUCTIVITY

With maximum precision and speeds up to 30 mph (40 kph), the Autopilot system can help you complete field operations quickly and efficiently.

### RISK-FREE FARMING

The Autopilot system takes the hassle out of farming. With its hands-free steering, the Autopilot system allows you to reduce fatigue and focus on other farming tasks to improve safety on your farm.

### DISPLAY COMPATIBILITY

Use the Trimble TMX-2050™ display, or CFX-750™ display as the control system for the Autopilot automated steering system and benefit from the highest levels of accuracy.

### Key Features

- ▶ Automatically steers your vehicle with one-inch repeatability
- ▶ Integrates directly into your vehicle's hydraulics for reduced clutter in cab
- ▶ Plugs in to many guidance-ready vehicles minimizing the need for additional equipment
- ▶ Ideal for the most demanding row crop farming applications
